📍 55, Laljee Saha Street, Dum Dum Cantt, Kolkata-700028, India

PROFESSIONAL SUMMARY

Backend Laravel Developer with 4+ years of experience building scalable, secure, and high-performance web applications using Laravel, PHP, and MySQL. Adept at architecting backend systems, integrating third-party APIs, and optimizing database queries. Proven expertise in queue-based background jobs, role-based access control, and custom mail services. Experienced in deploying and managing applications on local Linux servers using Apache/Nginx and cron jobs. Passionate about writing clean, maintainable code and solving real-world backend challenges.

OBJECTIVE

Seeking a backend Laravel Developer role where I can apply my expertise in Laravel, MySQL, and API development to build efficient, secure, and maintainable backend systems. I aim to contribute to impactful projects while continuing to grow as a backend engineer in a performance-driven environment.

EXPERIENCE

Profile: PHP/Laravel Developer

Organization: Alliance Broadband Services Pvt Ltd | Kolkata, India | 2021-Present

- **Developed a secure E-KYC Portal** using **Core PHP and MySQL**, enabling customer verification through third-party APIs. The system validates customer documents (e.g., Aadhaar, PAN) in real time, streamlining the digital onboarding process and reducing manual verification efforts.
- **Built an Employee Leave Management System** with **Laravel (backend), MySQL (database), and React (frontend)**. The platform allows employees to apply for leaves, which are automatically routed to department managers. Implemented background jobs using Laravel Queues to send email notifications to managers upon leave submission, ensuring seamless and timely communication.
- **Created a comprehensive HR Management Web Application** using **Laravel/PHP, MySQL, and JavaScript**, empowering HR teams to manage employee records, upload documents, generate salary slips, and export reports in CSV format. Key features include full CRUD operations, role-based access control (RBAC), live search, and pagination for efficient data management.
- **Built an ONT Stock Management Portal** using **Laravel and MySQL**, designed to help network and IT teams manage ONT (Optical Network Terminal) inventory. The system tracks stock levels, logs movement history, manages assigned devices, and provides real-time updates on stock availability across multiple locations.

Profile: Customer Service Agent

Organization: Air India Airport Services Ltd | Kolkata, India | 2019 – 2021

- Worked as a Customer Service Agent managing customer interactions related to air cargo shipments, including receiving inquiries, booking shipments, providing information on rates and customs requirements, handling customer concerns, and ensuring smooth cargo delivery, all while adhering to airline policies and regulations regarding cargo handling

Profile: Representative, Operations

Organization: Concentrix Daksh Services India | Kolkata, India | 2018-2019

- Worked as a Representative, Operations responsible for providing customer service and technical support, and ensuring that customer needs are met

SKILLS

Languages: PHP, JavaScript (basic)
